

NOTICE: This application form is authorized by section 283.37, Wis. Stats., and Chapters NR 151 and 216, Wis. Adm. Code. Personally identifiable information on this form may be used for other program purposes and may be made available to requestors under Wisconsin's Public Records laws and be posted on the Department's internet site.

Instructions: Complete the following for all permit applications. If additional space is needed to respond to a question, attach additional pages. Provide descriptions below that explain the program activities that you expect to develop and implement to comply with the Municipal Separate Storm Sewer System (MS4) general permit (<http://dnr.wi.gov/org/water/wm/nps/stormwater/muni.htm>). Section 3 of the MS4 general permit contains the compliance schedules that direct when the individual program activities need to be developed and submitted to the Department for review. The detailed programs that are developed and submitted to the Department for review may deviate from the program activities described below if necessary. The descriptions provided below are necessary for the Department to verify that the municipality's program activities comply with the permit.

Section I: Applicant Information

Name of Municipality

Village of Suamico

Mailing Address

2999 Lakeview Drive

City

Suamico

State

WI

Postal Code

54173

County(s) in which Applicant is located

Brown

Type of Municipality: (check one)

☐ County

☐ City

☒ Village

☐ Town

☐ Other (specify)

Section II: Local Contact Information (check one):

Name of Municipal Contact Person

Randy Loberger

Title

Village Engineer

Mailing Address

2999 Lakeview Drive

City

Suamico

State

WI

Postal Code

54173

E-mail address

Randy@Suamico.org

Telephone Number (include area code)

920-434-8410

Fax Number (include area code)

920-434-8420

Section III: Water Quality Concerns

Yes

No

☐

☒

Does any part of the MS4 discharge to an outstanding resource water (ORW) or exceptional resource water (ERW) listed under s. NR 102.10 or 102.11, Wis. Adm. Code? (An unofficial list of ORWs and ERWs may be found on the Department's Internet site at: <http://dnr.wi.gov/org/water/wm/wqs/>)

☒

☐

Does any part of the MS4 discharge to an impaired waterbody listed in accordance with section 303(d)(1) of the federal Clean Water Act, 33 USC § 1313(d)(1)(C)? (A list of Wisconsin impaired waterbodies may be found on the Department's Internet site at: <http://dnr.wi.gov/org/water/wm/wqs/303d/303d.html>)

Section IV: Area and Population Within the MS4

Yes

No

☒

☐

Is the MS4 within an "Urbanized Area" as defined by U.S. EPA? (See <http://www.epa.gov/npdes/pubs/fact2-2.pdf>)

If no, skip the rest of this section and continue to Section V. If yes, estimate the area served by and the population within the MS4 in an Urbanized Area (UA).

(Urbanized Area maps are available on the EPA web site at: <http://cfpub1.epa.gov/npdes/stormwater/urbanmaps.cfm>)

Total municipal area (in square miles):

36.25

Total municipal population (in year 2000):

8686

MS4 service area within Urbanized Area (in square miles):

6.8

Municipal population within Urbanized Area (in year 2000):

3,856

Section V: Potential Permit Exemption

Yes

No

☐

☒

Section NR 216.023, Wis. Adm. Code, allows certain MS4s that have less than 1000 people residing in an urbanized area to be waived from having to obtain municipal storm water permit coverage.

Do you believe that the MS4 may be eligible for this potential exemption?

Section VI: Summary of Municipal Storm Water Program Activities

Describe the programs or activities the municipality is doing or will do to comply with the requirements of the MS4 general permit. Attach additional pages if necessary.

A. Public Education and Outreach

Describe the public education and outreach program activities that the municipality will implement to comply with section 2.1 of the MS4 general permit.

The Village intends to educate the citizens of our community through mailings, our internet web page, quarterly news letters and public informational meetings. As a NEWSC member, the Village of Suamico is contributing to programs designed to educate area residents as well as conducting surveys to gather information relative to creating future educational programs. We intend to use documents available from NEWSC and other available sources which have been created for this purpose such as BMP's for lawn fertilizing, pesticide use, composting, automobile operation and maintenance, and pet waste disposals. Home builders and contractors will need to receive information to comply with new ordinances and BMP requirements. This information will likely be included with permit approvals for the associated work. Riparian owners will be educated and encouraged to implement measures to reduce streambank erosion. The Village of Suamico will submit a public education and outreach program to the DNR within 18 months of coverage. The Village will use the NEWSC I&E plan as a model for suggestions on strategies to meet local educational goals, for guidance on how to develop the local I&E plan, and for insight on how to work with NEWSC to achieve local goals.

B. Public Involvement and Participation

Describe the public involvement and participation program activities that the municipality will promote to comply with section 2.2 of the MS4 general permit.

We have several areas in the Village of Suamico which have been approved for development with rain gardens utilized to reduce runoff. Public maintenance of these features will be required by home owners. We will be providing information to assist these residents. We plan to educate all residents and encourage rain barrels to be used to capture roof runoff for watering purposes. We also plan to utilize mandatory community service requirements in our school system to familiarize the younger residents of our community by having them assist in community storm water projects. The Village of Suamico will submit a public involvement and participation program to the DNR within 18 months of permit coverage. The program will include public notification regarding the activities performed as part of the program and the participation and compliance of applicable state and local public notice requirements.

C. Illicit Discharge Detection & Elimination

Describe the illicit discharge detection and elimination program authority and activities that the municipality will develop and implement to comply with section 2.3 of the MS4 general permit.

The Village of Suamico will submit an Illicit Discharge Detection and elimination Ordinance to the DNR within 24 months of permit coverage. The NEWSC Model Illicit Discharge Detection and Elimination Ordinance will be used as a base model. Once adopted, this ordinance provides the necessary regulatory authority to detect and remove illicit connections and discharges to the MS4. We will create an inventory of all major outfalls and initiate a testing program to screen these facilities during dry weather periods. This screening will include visual observations and field analysis. The Village will work with NEWSC to create standard visual observation sheets that will be used to streamline this process. Initial field screenings will be implemented within 36 months of permit coverage. The village will also initiate a response program to deal with illicit discharges. The Spill Notification Procedure, which will be submitted to the DNR within 24 months of permit coverage will identify and provide contact numbers of those individuals that should be involved in a spill situation. This procedure will require immediate notification of the DNR in the event of a spill or release of a hazardous substance. The Spill Hotline number will be posted at the Village Hall and on our internet site. This information will be updated annually or more frequently if there are changes in management or personnel.

D. Construction Site Pollution Control

Describe the construction site pollutant control program authority and activities that the municipality will develop and implement to comply with section 2.4 of the MS4 general permit.

The Village will be adopting an erosion control ordinance to allow staff to enforce approved BMP's to control site pollutant runoff. This Construction Site Pollutant Control Ordinance will be submitted to the DNR within 18 months of permit coverage. The NEWSC Model Construction Site Erosion Control Zoning Ordinance will be used as a base model. Once adopted, this ordinance provides the necessary regulatory authority to require erosion and sediment control at construction sites and ensure compliance. The Village will determine what community staff or consultants will be responsible for site inspection and enforcement. The Village will submit construction site inspection and enforcement procedures to the DNR within 18 months of permit coverage.

E. Post-Construction Site Storm Water Management

Describe the post-construction storm water management program authority and activities that the municipality will develop and implement to comply with section 2.5 of the MS4 general permit.

In addition to the construction site pollution control ordinance, we will also be adopting a post construction site storm water management ordinance. Again the NEWSC Model Post-Construction Storm Water Management Zoning Ordinance will be used as a base model. Once adopted, this ordinance provides the necessary regulatory authority which controls the quality of discharges from areas of new development and redevelopment, after construction is completed. The Village will create and submit long-term maintenance procedures to the DNR within 18 months of permit coverage.

F. Pollution Prevention

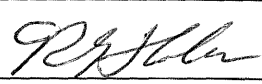

Describe the pollution prevention program activities that the municipality will implement to comply with section 2.6 of the MS4 general permit.

The Village will submit a pollution prevention program to the DNR within 24 months of permit coverage. This plan will include a schedule for routine maintenance of municipally owned and operated structural storm water management facilities to maintain efficiency. The plan will address proper disposal of street sweepings, catch basin cleanings, waste and road salt/deicer. The program will also include Village plans to ensure proper management of leaves and grass clippings and application of lawn and garden fertilizers on municipally controlled properties. This includes site-specific nutrient application schedules based on appropriate soil tests. Procedures will include storm water pollution prevention planning for municipal garages, storage areas and other sources of storm water pollution from municipal garages.

The Village will adopt measures to reduce municipal sources of storm water contamination within source water protection areas. The Village will continue to evaluate storm water training opportunities for staff and elected officials.

Section VII: Certification

Certification: I hereby certify that I am an authorized representative of the municipality that is the subject of this application for general permit coverage, and that the information provided is true and complete, to the best of my knowledge. I understand that Wisconsin law provides severe penalties for submitting false information.
